Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a camera signal processing apparatus having an interpolated pixel generating means, correlation detection means, color difference signal detecting circuit and a selecting circuit for selecting a smallest one of the color difference signals. However, the prior art does not teach or suggest the use of a correlation detecting circuit having both a band-pass filter and a low-pass filter for detecting a correlation value indicative of a degree of correlation in two directions wherein the band-pass filter has coefficients equivalent to $[-1, 0, 2, 0, -1]$ as depicted in Figure 16. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
